

At a Glance for Cannabis Transport and Storage Application and Licensing

	Class 5 Transport & Storage	
Summary	A single licence exists for those offering transport and storage services. The holder may choose to offer just one service, or both. To offer either or both services, it is just necessary to demonstrate competence to the GSC.	
	The transport element	The storage element
Regulatory function of the licence	This licence makes sure that the transportation of controlled cannabinoids is secure.	This licence makes sure that the storage of controlled cannabinoids is secure
When licences are required	<ul style="list-style-type: none"> You offer a transport service to Isle of Man licensees (e.g. growers) to take their product to the ports or move material between their facilities; You have a core licence and you wish to transport material between sites in different locations 	<ul style="list-style-type: none"> You offer a safe storage facility for other licensees; You have a core licence which produces products which are then moved to a site in a different location
Multi-licensing?	A licensee may hold this class of licence and other classes of licence. Once this class of licence is held, it covers any number of additional facilities and transport routes, which are added to the licence upon request (and vetting) at no cost.	
When licences are not required	If a cultivation/research, extraction, manufacturing or analysis licence is held then the licensee does not require a storage licence because the storage function is organic to the core licence provided product does not leave the licence's security perimeter.	
Transport and storage permissions	The licence permits controlled cannabinoids to be transported or stored. Specifically	
Licence fees	The licence fee is £5,000 in year 1, and £2,500 for 2 onwards.	
Import/export	You do not need an export or import licence just because you move material across the Isle of Man's border. Your customers do need these licences, and you are obliged to check before you work with them.
