Online Gambling
Token/Blockchain Based Software Supplier Licence

The Token/Blockchain-Based Software Supplier Licence is designed for businesses that provide gambling and gaming software solutions using blockchain technology or token-based systems. This could be tokens, cryptocurrency, NFTs, blockchain powered games or any other blockchain-based products.

This licence allows suppliers to offer their products and services to e-gaming operators worldwide, in jurisdictions where it is legal to do so, demonstrating compliance with the Isle of Man's regulatory standards. It is ideal for:

- Software suppliers developing blockchain-based or tokenised gambling solutions
- Businesses offering DLT-powered gaming platforms or tokenised in-game assets
- Companies seeking to supply innovative gambling technology to both Isle of Man and global operators

As with the standard Software Supplier Licence, this licence is elective, and suppliers may offer these products to Isle of Man licensees without being licensed by the GSC.

Key Features

The Token/Blockchain-Based Software Supplier Licence:

- Permits the supply of blockchain-based or tokenised gambling software to licensed operators.
- Enables suppliers to serve both Isle of Man licensees and international e-gaming businesses.
- Ensures that products meet the GSC's standards for fairness, security, and transparency.
- Suitable for innovative businesses leveraging distributed ledger technology (DLT) or tokenised gaming ecosystems.

Requirements:

- Must comply with the Isle of Man's technical and regulatory standards for gambling software
- Products must be tested and approved by GSC-approved test houses
- Ongoing supervision and compliance reporting to the GSC
- Adherence to anti-money laundering (AML) and player protection requirements
